Biodegradable Extruder Machine

Biodegradable twin-screw extruder, biodegradable pellet making machine and biodegradable plastic pellet extruder making machine are equipment specially designed for the production of biodegradable materials.

These machines do not release toxic or harmful substances during the production process, meet strict environmental protection requirements, and the particles produced do not pose a threat to the environment.

Versatile Processing Capabilities: Offers excellent processing versatility for a wide range of biodegradable plastic materials, such as starch-based plastics and polylactic acid, and its twin-screw design provides excellent mixing and melting capabilities.

Quality control: A controlled extrusion process is used to maintain the uniformity and consistency of the pellet products, and the quality of the pellets is ensured through advanced temperature and pressure control systems.

Application fields: Biodegradable materials are widely used in the food and packaging fields, agricultural fields, and medical materials and equipment.

Protect the environment, care for the earth!
