

## CE Alloy Steel Fast Screen Hydraulic Screen Changer For Plastic Extruders

Our Product Introduction

for more products please visit us on [extrudergranulator.com](http://extrudergranulator.com)

### Basic Information

- Place of Origin: Nanjing, China
- Brand Name: HLD/KL
- Certification: CE
- Model Number: Various
- Minimum Order Quantity: 1 set
- Price: Price negotiable
- Packaging Details: Film packaging, bubble film packaging
- Delivery Time: 7 work days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 sets per month

### Product Specification

- Product Name: Hydraulic Screen Changer
- Material: Alloy Steel
- Category: Press Plate
- Usage: Sheets, Plates, Pipes, Wires, Cables, Granulation
- Feature: High Temperature And High Pressure Resistance
- Main Power: Customized
- Corrosion Resistance: Yes
- Color: Customized
- Dimension: Customized
- Weight: Customized

### Product Description

Extruder parts - hydraulic screen changer

Hydraulic screen changer is an important accessory for filtering impurities in plastic extruders. Through its high-efficiency filtration and rapid screen changing functions, it significantly improves the production efficiency and product quality of plastic extruders, and is indispensable for the plastics processing industry. one of the devices.

**Attribute**

Usually made of alloy steel, it has high wear resistance, high pressure resistance and high precision. It adopts multi-layer co-extrusion die head with different functions and classifications.

**Function**

Filter impurities during the plastic extrusion process to prevent defective products and material waste. It can realize network replacement without stopping the machine, improving production efficiency and equipment utilization.

**Feature**

It has the function of rapid network change, and the network change time is less than or equal to 2 seconds.

Adopts pressure sealing device to meet high extrusion production requirements.

Rheologically optimized honeycomb filter plate reduces melt shear.

Internal heating device, energy-saving and efficient.

Suitable for high viscosity plastics, such as PVC, PE, PP, etc.

**Application**

It can be used in various plastic processing processes such as mixing, masterbatch, recycling, sheet extrusion, profile extrusion, and pipe production.

It is especially suitable for plastic recycling and filler production, as well as scenarios that require continuous production and do not require high material fluidity.

Suitable for extruder production lines such as melt blown cloth machines, melt pumps, and reactors.

It can be used in the production process of various plastic products such as film blowing production, pipe production, and hollow product production.

## Product details

## FAQ

### 1:How many years of experience do you have?

Over 15 years experience in extruder industry.

### 2:Are you traders or manufacturers?What is the area of the factory?

We are manufacturer,The factory is over 5000 square meters.

### 3:Screw and barrel accessories, who is produced?

Our factory manufactures it ourselves

### 4:Can I have a sample order for extruder?

Yes, we welcome sample order to test and check quality. Mixed samples are acceptable.

### 5:How to proceed an order for ?

Firstly ,let us know your requirements or application.

Secondly ,We quote according to your requirements or our suggestions.

Thirdly ,customer confirms the samples and places deposit for formal order.

Fourthly, We arrange the production.

Finally, arrange delivery

**6: Provide technology and formula?**

For orders over a certain amount, we will provide the technology and formula to help you complete the project.

**7: Have a catalogue?**
