

## CE High Precision Long Life Plastic Extruder Vacuum Pump With Low Energy Consumption

Our Product Introduction

for more products please visit us on [extrudergranulator.com](http://extrudergranulator.com)

### Basic Information

- Place of Origin: Nanjing, China
- Brand Name: HLD/KL
- Certification: CE
- Model Number: Various
- Minimum Order Quantity: 1 set
- Price: Price negotiable
- Packaging Details: Film packaging, bubble film packaging
- Delivery Time: 7 work days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 sets per month

### Product Specification

- Product Name: Vacuum Pumps
- Category: Low-voltage Electrical Appliances
- Precision: High
- Usage: Industrial, Extruder Parts,
- Main Power: Customized
- Corrosion Resistance: Yes
- Durability: High
- Color: Customized
- Dimension: Customized
- Weight: Customized

### Product Description

Extruder parts - Vacuum pumps

Vacuum pumps in extruder accessories are usually used to create a vacuum environment. The main purpose is to extract air or other gases from the extruder to ensure that the material during the extrusion process can flow evenly and steadily and avoid bubbles or other defects. , by creating a controlled vacuum environment, it can significantly improve the quality and consistency of materials during the production process, and is widely used in various industrial and production fields.

**Attributes**

Gas rate: The performance of a vacuum pump is usually measured by its pumping rate (exhaust volume), that is, the volume of gas extracted from the extruder per unit time.

Vacuum degree: The maximum vacuum degree that can be achieved, that is, the lowest air pressure level that can be achieved during operation

**Functions**

Vacuuming: Extracting the gas inside the extruder to create a low pressure or high vacuum environment to promote the fluidity and quality of the material.

Maintaining stable working conditions: Ensure that the material is handled in the appropriate environment during the extrusion process, thereby reducing defects and improving product quality.

**Features**

Efficiency: Provides efficient gas extraction rate to meet different requirements in the extrusion process.

Stability: Able to operate stably for a long time to ensure the continuity and consistency of the production process.

**Applications**

Plastic extrusion: used for polymer extrusion molding, such as pipes, films, profiles, etc., to ensure the uniformity and quality of materials.

Rubber extrusion: in the extrusion production of rubber products, such as sealing strips, pipe fittings, etc., it helps to remove air and impurities and improve the quality of finished products.

Food industry: used for extrusion in food processing, such as in the production of candy, bread, etc., to ensure the purity and quality of food materials.

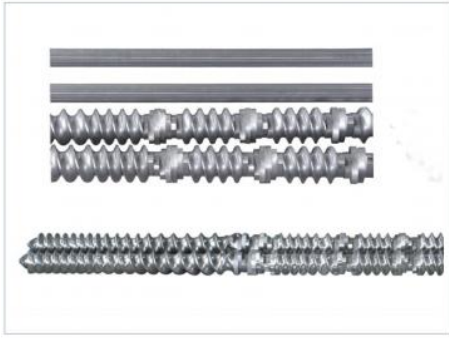

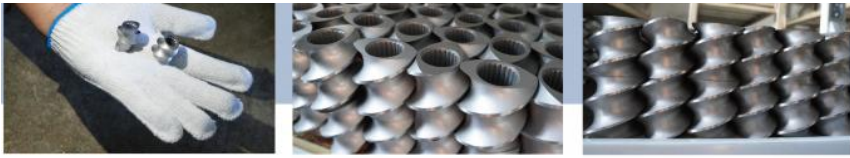

Pharmaceutical industry: in pharmaceutical manufacturing, such as the extrusion process of pharmaceutical packaging materials, it ensures the safety and stability of products.

## Product details

## FAQ

### 1:How many years of experience do you have?

Over 15 years experience in extruder industry.

### 2:Are you traders or manufacturers?What is the area of the factory?

We are manufacturer,The factory is over 5000 square meters.

### 3:Screw and barrel accessories, who is produced?

Our factory manufactures it ourselves

### 4:Can I have a sample order for extruder?

Yes, we welcome sample order to test and check quality. Mixed samples are acceptable.

### 5:How to proceed an order for ?

Firstly ,let us know your requirements or application.

Secondly ,We quote according to your requirements or our suggestions.

Thirdly ,customer confirms the samples and places deposit for formal order.

Fourthly, We arrange the production.

Finally, arrange delivery

**6: Provide technology and formula?**

For orders over a certain amount, we will provide the technology and formula to help you complete the project.

**7: Have a catalogue?**
